Contract growing options are available to meet your future needs. Contact us to discuss details.

"I wanted to take a minute to thank you for your ongoing services at Hollywood Branch Stream Restoration. I've been so impressed with your staff, expertise, and professionalism. Thank you for outstanding service and a great project. I look forward to our continued project success and the opportunities to team together in the future."

- James Christian, President  
Environmental Design & Construction, LLC

## WHY ECOTONE'S PLANTS?

- Our wholesale plants are identical to those installed on our own successful ecological restoration projects.
- We grow for long-term resilience. Rich growing media and mycorrhizal inoculants promote healthy growth long after our plants leave the nursery.

## ABOUT ECOTONE

We are an ecological restoration firm that designs and builds sustainable ecological solutions. We provide full-delivery ecosystem restoration, mitigation, design, construction, and consulting solutions throughout the United States. Some of our areas of expertise include stream design and construction, wetland restoration, stormwater management, reforestation, wildlife habitat management, and mitigation credit banking. As the industry's preferred one-stop solution for ecological restoration projects we help our clients navigate the regulatory process, minimize project costs, and deliver sustainable restoration solutions.

## OTHER SERVICES

- Deer fencing - more cost-effective than tree shelters
- Ecological solutions for beaver management
- Full-service guaranteed planting and site maintenance
- Invasive species control
